HEAT STRESS ASSESSMENT

Facility Assessment: highlighting your company's at-risk level for experiencing a dehydration or heat stress related issue. Upon completion of this assessment, you'll be provided with an outline of your results and predicted risk level.

Training Services include Hydration Training and Heat Stress

How to use the Heat Index:

Across top (Air temperature) locate today's predicted high temperature.

Down left side (Relative humidity) locate today's predicted humidity.

Follow across and down.

3.1 to find Apparent Temperature or "What It Feels Like".

Heat Index Values were derived for steady, light wind conditions. Exposure to hot sun can increase values by up to 18°. Strong winds, particularly with hot, dry air can be extremely hazardous.
